Content Marketing is growing in popularity. Don't be left behind.

The reasons below should move you to take action and make it work for your small or micro business. Remember it does not matter where your business is located or how big or tiny it is.

- It is less expensive compared to advertising via traditional media.
- You will market to a much wider global audience: not only those in your country or hometown.
- Build authority just by showcasing your expertise, experiences, unique skills and knowledge with those who value what you give.

- Traditional media appears to be on the way out back to the Stone Age. You will benefit greatly from the new age of digital marketing.
- You can place your promotional efforts on autopilot. Automation is part of content marketing.
- Earn additional income from your website content even if that has never been your original goal. Call it passive income on steroids.
